EXHIBIT #14
AMWTP DEIS
Twin Falls, ID
August 20, 1998
Name: Marlees Teasley

Addendum: Two members of my immediate family (which includes me) have hypothyroidism & I have recently been diagnosed with a rather rare auto-immune disorder. I thought it was rare until I started talking to people around Twin Falls & found a whole network of women with this or a very similar disorder. Strange — oh! I'm thirsty but should I drink this water? M. Teasley

Fibromyalgia

earthquake zone & over a major aquifer — be your choice? Of course, there is no really large population center so that would not be a factor.

Lastly, I would suggest a change in the name to Idaho National Environmental Engineering Lab & the Idaho National Experimental Engineering Lab.

Marlees Teasley
610 Sunrise Rd
Twin Falls, Idaho

8-20-98

I asked a question of the DOE at an SIS hearing 4 or 5 years ago and received no answer.

That question was — if you experts were seeking an area which would be "safe" for (in this present case) an advanced mixed waste treatment project would the INEEL site — which is sitting on a potential
