

Exhibit C.8-8 – Site Services Mandatory Services

The INL Contractor will provide site general infrastructure support and safeguards and security services to the ICP contractor as follows:

General Infrastructure Support

General Infrastructure Support is a direct funded activity and will be provided by the INL contractor to the ICP contractor at no cost over the entire contract period of performance. The INL contractor will maintain site roads, including snow removal, weed control, lighting, and sign maintenance up to the main gate of the EM-owned site areas and facilities including the parking lot outside of the main gate entrance at the Idaho Nuclear Technology and Engineering Center (INTEC), Radioactive Waste Management Complex (RWMC), and Test Area North (TAN) facility areas.

The INL contractor will maintain and inspect the existing railroad system up to the EM facility perimeter fence or area boundary. The ICP contractor shall maintain roads and railroads within its facility areas, and will fund any upgrades required outside of its facility area, if those upgrades are needed solely to support the EM mission. The INL contractor will maintain other site grounds that are outside of the EM facility areas and outlying EM facilities and structures. The INL contractor will maintain the site seismic monitoring network. The ICP and INL contractors are responsible for their own infrastructure support beyond that defined in this section.

Support Services for Safeguards and Security

The INL Contractor will coordinate the maintenance of a Site Safeguards and Security Plan, with input from the ICP contractor and other site tenants. The INL contractor will coordinate safeguards and security drills and exercises with the ICP contractor and other site tenants. The INL contractor will provide for the issuance of photographic identification passes (badges) for all site-affiliated personnel. The INL contractor will provide protective forces for all site areas. The INL Laboratory Director will administer foreign visits and assignments. Costs for repairs to the security systems and components located within the security buildings will be borne by the INL contractor via direct funding through the Safeguards and Security Program. However, costs for repairs or upgrades to security systems and components that feed into the site-wide Central Alarm Station at INTEC (CPP-1674) shall be borne by the respective user organization i.e., EM, NE, or OCRWM. The INL contractor will provide, at no additional cost to the ICP contractor, inspection and testing services for all required safeguards and security-related systems and components at the INL. The level of security force/support provided to the ICP contractor is baselined to that level in place in FY2012. That level of service will be provided at no cost to the ICP contractor over the entire period of the ICP contract. The ICP contractor shall assist in securing funding for any level of security service requested for EM operations that is above the FY2011 baseline.
